Liberals W. R. Howson, Edmonton
and J. J. Bowlen, Calgary, have re-
tained their seats in the house,

John Irvin, Calgary, has been suc-
cessful in holding on to his seat.

At this time the election of At-
torney General Lymburn, U. F. A.,
is uncertain.

Marking the third consignment of
pure-bred cattle shipped to the Uni-
ted States with the last three months,
155 head of cattle of different breeds,
consign to A. V. Lampaert, Redmond,
Wash., have been shipped within the
last two weeks. The stock is founda-
tion material for improvement of herds
in the U. S.

Five Million Acres of Land Must be Burn- ed for Rust

Manitoba and Saskatche-
wan Farmers Face Sad
Calamity

Five million acres of the
richest crop the Manitoba and
Saskatchewan drouth area has
ever seen will have to be
burned off with oil, it was dis-
closed by Major H. G. L.
Strange, chief of the Searle
Grain research bureau when
he arrived in Edmonton
Thursday, following a swing
across the prairies on an ex-
tensive inspection tour.

Major Strange is directing the
forces of five grain firms, the Searle,
British American, National, Northern
and Midland and Pacific, three pro-
vincial governments, the federal
government, three western univer-
sities, the dominion seed branch, the
experimental farms, 840 elevator
agents and 22,000 farmers who are
all co-operating on an immense crop
testing plan, designed to make all
Canadian wheat grade No. 1 Northern.

BLEW IN FROM MEXICO

All of Manitoba and the eastern
half of Saskatchewan has been in-
fected with rust which blew up from
Mexico on the wings of the prevail-
ing southerly winds, said Major
Strange.

Nine million acres have been
infected, half of which must be
burned off with oil to prevent future
infection.

O. L. Mielke, of Zehr, Sask.,
formerly of Chinook
was in town on Tuesday.

Mr. Beynon, Liberal Candidate,
who was scheduled to speak at Chi-
nook Tuesday, had a break down
with his car and could not arrive in
time. He spoke at Youngstown in
the evening.

To Encourage Winter Feeding Young Cattle

OTTAWA, Aug. 14. [C. P.]—
To encourage winter feeding of
young cattle and lambs, the Domi-
nion will continue for another winter
season its feeder policy which was
started last year, it was announced
today by Robert Weir, minister of
agriculture.

To be effective until December 31,
the Dominion will provide one-way
transportation and traveling ex-
penses to any Canadian farmer pur-
chasing one or more carloads of
young feeder cattle or lambs accord-
ing to conditions laid down by the
agricultural department.

HEMARUKA MURDERER

TO HANG AUGUST 21

Word received from Ottawa indi-
cates that there will be no inter-
ference in the death sentence of Wil-
liam Hawryluk, of Hemaruka, who
was convicted for the murder of his
wife on their farm home on January
18. Hawryluk was sentenced to be
hanged on August 21 at Ft. Sask-
atchewan when he came up for trial
at Hanna last June.

Jean Mortimer is visiting
this week with Grace Stewart.

Mr. A. J. Mumford purchas-
ed a new 1935 V-8 Ford
motor car from Cooley Bros.

Mrs. Graham, of Winnipeg
arrived in Chinook last week
where she will spend a few
months.

Alberta coal production for the pre-
sent year to the end of June was 2-
341,524 tons, compared with 2,018,115
tons for the same period last year,
showing an increase of 323,409 tons.

Mrs. August Rosenau, who
underwent an operation in the
Cereal hospital, is recovering.

Now is the time to get your Binder
and Mower repairs.

We have a good stock of both
I. H. C. and John Deere
repairs on hand

also
Holland Binder Twine

Put your orders in early.

The Object Of An Election

By the time this article appears in print the very interesting Provincial election campaign which has been in progress in Alberta will be concluded and the electors of that province will have rendered their judgment as between the several parties and their respective policies. This Alberta campaign has been unusually interesting, not only on account of the number and variety of political groups which have placed candidates in the field, but because a plan of system of finance and economics entirely new to Canada, namely Social Credit, has been urged for adoption and a trial. As a result the attention of all Canada, and even in other countries, was focused on Alberta.

By this time, too, Canadians will be in the throes of a Dominion general election which also presents a situation that is new in the political history of Canada. The present contest will not be confined to the two traditional parties, Liberal and Conservative, because since the election of five years ago another two political parties have come into being and are contending for the favor of the voters in support of policies and programmes which they believe are necessary to solve the problems which have arisen in this rapidly changing world.

So, in scores of constituencies, instead of making a clear-cut decision as between two aspiring candidates for Parliamentary honors, and between two distinct lines of policy as represented by Conservatism and Liberalism, the voters will have to make up their minds as between three, four, and possibly even a larger number of candidates presenting differing programmes.

The situation is one that undoubtedly throws a greater responsibility upon the individual voter for at least one reason, for for others. The object of Parliamentary elections under the British system of democratic responsible government is two-fold, and it is vitally important that both be kept in mind, and due weight and consideration given to them by the voter as he or she proceeds to mark a ballot.

In the first place, the voter is making choice of a personal representative in the House of Commons, the person whom he or she considers best qualified to present his or her views, best qualified to represent that particular constituency, best qualified to represent the views and interests of the Province of which such constituency forms a part, and best qualified to deal with those larger questions of national, even world, policy in the state-manlike handling of which the welfare of all Provinces, constituencies and individuals is involved.

But the selection of such individual representative is not all that is decided by a voter when marking a ballot. There is another, possibly an even greater issue at stake. The basic object of an election is to set up the governing body of the nation; in other words, to create a Government to the executive members of which is entrusted the heavy responsibility of formulating policies and administering the laws and the national business of the Dominion. It is not merely a debating or consulting body that is being chosen, but the Government of the country.

The biggest business enterprise in Canada is Canada itself. If that business is mismanaged, if it is conducted along wrong lines of policy, then each and every other business in Canada, and every individual in Canada, stands to suffer loss. Stated another way, individual voters are the shareholders in the largest and most important of all business enterprises—Canada itself. In a general election they are meeting as shareholders to choose a board of directors—the House of Commons. From the 245 members thus chosen, an executive or board of management is selected, namely, the cabinet of ministers chosen by the president of the whole corporation, the Prime Minister, and responsible to him and to the House of Commons.

If in the exercise of their individual rights the voters choose various groups of members having opposing views as to how the business of the country should be conducted, and the nature of the policies that should be followed, and as a result no one group commands a majority over all other groups, and consequently no group is in a position to undertake the responsibility of attempting to govern the country, then government becomes practically impossible, a deadlock ensues, the business of the country is neglected and a straight course steered. The proper conduct of government and national business is impossible and the whole country and every interest suffers.

Consequently, it is necessary for the individual voter in exercising the best judgment possible in making selection of a personal representative in the House of Commons to give consideration, not alone to the qualifications of such possible representative, but also to the personnel, leadership and policies of the group to which he belongs and supports. He must decide, too, whether such group has within itself the necessary numbers, power and ability to establish a strong Government and give to Canada that sound and efficient administration which the welfare of all citizens demands shall be given.

Admittedly, Canada is a hard country to govern. With a comparatively small population, scattered thinly across half a continent, constituted of people of many racial origins, different languages, and various beliefs, several Provinces mainly rural in occupation, but the two central and by far the most populous Provinces highly industrialized, the problem of popular democratic government is no easy one to solve. Yet it must be solved if all are not to suffer.

Such is the situation and some of the more vital considerations which the voters of Canada must seriously weigh during the next few weeks, and finally must register their judgment upon at the ballot boxes.

Idea Came From India

The vogue of mixing wine or water, lemon juice, sugar, spice and water was brought to England from India and it seems to be named from the Hindu word "punch" meaning five, referring to the usual number of ingredients.

A Tragic Souvenir

A large gold medal which was specially struck by the City of Paris for presentation to King Alexander in commemoration of the visit which he was to have paid to the French capital, is to be given as a tragic souvenir to his widow, Queen Marie of Yugoslavia.

Approximately 11,000,000 words are spoken annually by the average man. Speaking of women, you will have to add more zeros.

Children grow more rapidly during April, May and June than any other period of the year, according to results of a survey conducted in Europe.

A Fast Growing Business

Shark Catching Is Money Maker According To Captain

Up from the Philippines to New York came Capt. Jean M. Ellerich with a message for housewives in search of a new table delicacy and for ambitious young men seeking a job with a future.

"Shark's meat," said the captain, "is a dish from heaven." The shark catching business," he added, "is a fast growing enterprise and one young man might well consider for their life's work."

The captain, who has sharked all around the globe, apparently never heard of steaks from Texas rattlesnakes, but he would have you understand shark meat has become a very popular dish. Why they're serving fillet de sole from sharks to the most discriminating diners, although sometimes under another name.

By virtue of the increasing popularity, the business itself has grown by leaps and bounds, he said, and even during the depression it held its own along with the red-ink manufacturers and the pee wee golf courses. Like troubles, there apparently is no end to the sharks. Although a million are taken every year, there are just as many to-day; in fact 250 varieties.

Capt. Ellerich is here to learn the different varieties from aquarium officials and survey market possibilities.

In the Philippines he first learned how thoughtless were the natives in throwing away all of the shark, except the fins, which they used for soup.

To-day the skins are used for leather, while the meat in addition to being a palatable food for human consumption, may be used for stock feed and fertilizer.

Several additional products are obtained from the glands, and in distant parts of the world the teeth are used for money. In the far interior of Asia, said Capt. Ellerich, a well polished shark tooth will win a bride where \$10,000 would fail.

Willing To Take Risk

Man Signs Up For Test In Freezing Experiment

Stephen Simkhovitch, 34, a strapping fellow, writer and scenarist, signed a contract at Hollywood, Cal., in which he agreed to be frozen solid and possibly revived in the interests of medical science.

Dr. Ralph S. Willard, young Russian-born chemist, who said he has been freezing and reviving guinea pigs, rabbits and monkeys over a six-year period and claiming that tuberculous, at least, can be overcome through this treatment, agreed to conduct the human experiment.

Simkhovitch said he was prompted by a desire to "do something for humanity for a change," and to determine "if there is life after death."

He said he was a son of V. C. Simkhovitch, professor of economic history at Columbia University, and Mrs. Mary K. Simkhovitch, head of Greenwich House in New York, widely known student of sociology.

Work Of Toronto Artist

Tiny Miniature Of Premier Hepburn Painted On Bloodstone

Said to be one of the world's smallest miniatures, a portrait in oils of Premier Mitchell F. Hepburn, painted on a bloodstone was to be exhibited at the Canadian National Exhibition by Joseph Hilbert, Hungarian-born Canadian citizen, and well-known Toronto artist.

The tiny portrait took three and a half months to execute and was painted with single hairs in place of a brush. The greatest dimension of the pictures is one quarter of an inch and the head itself, with its wealth of details, measures only one-eighth of an inch.

The naked eye alone was used in this remarkable piece of work.

A Matter Of Choice

Should we say Abyssinia or Ethiopia? The American National Geographical Society says it should be the latter because it has the official sanction of the Ethiopian government and Ethiopians object to the word Abyssinia because "it is derived from an Arab word meaning 'a mixed race.' Friends of Italy will, therefore, say, Abyssinia, and friends of the African nation, Ethiopia.—Hamilton Spectator.

Unusual Bombardment

Turin, Italy, was besieged by a French army in 1640, and was saved by one of the most unusual bombardments in history. In trying to relieve their starving allies, Spanish troops hollowed out cannon balls, filled them with flour, and fired them into the town.

Smallest Adult In World

Girl Nineteen Is Only Twenty-One Inches Tall

Margaret Ann Robinson gave a birthday party the other day. At nineteen she stands only twenty-one inches, or one foot, nine, in her slippers, and weighs only eighteen pounds.

At the office of George Hamid Enterprises, 1590 Broadway, New York, where pictures were taken, it was declared that she was the smallest adult in the world.

Her mother makes her clothes. She quit growing when five months old, and she never has weighed more than twenty-two pounds.

She was born in Denver, has had baby parts in movies, plays solitaire, has been in the show business two years, plays a violin eleven and one-half inches over all, likes to keep house, dances, and walked a mile yesterday. She likes almost all food except milk and eggs, and recently signed a contract for exhibition at Shrine circuses.

Her father boasted that she is nine and one-half inches shorter than the renowned Tom Thumb, whose smallness helped to make Barnum bigger as a circus magnet, and that to step into the carriage which Queen Victoria gave Tom Thumb she had to climb on a ten-inch box. This carriage is now a museum piece at the University of New Hampshire.

Must Learn Over Again

Operation On Throat Forces Famous Singer To Become Student

Amelita Galli-Curci, internationally famous prima donna, must learn to sing all over again.

For 15 years—through the zenith of her brilliant opera career—the diva gave the world sweet music from a throat half blocked by goitre. By sheer will power she forced her beautiful notes on a devious detour through her windpipe.

Now, the tumor—"potato," she called it—is gone. Her throat has been cleared of its old problem, and filled with a new.

The successful operation that removed the 6½ ounce obstruction doubled the amount of air her trachea can hold. She must now accustom herself to control the increased volume so she can produce the same clear tones.

The "re-education" lessons begin in Henroin hospital, where the singer was resting comfortably.

Single notes and simple scales will adjust the disturbed throat muscles before more difficult exercises begin. That will be after all danger of lesions has been passed.

Use Camouflage Methods

Speeding Motorists In London Trapped By Disguised Police

Disguised police in London have been using camouflage methods to trap speeding motorists. To-day one cannot tell, driving along London's streets, whether the grocery truck loafing along in front is really a grocery truck. It looks like a grocery truck and even has lettering on its sides to prove it, but that's no sign the driver isn't one of Scotland Yard's finest, out enjoying the summer weather and enforcing London's new 30-mile speed limit.

The "gongsters" as they are called (because they pound a gong when they've treed an unwary motorist), may be found in almost anything, from a 1918 model truck to the latest thing in sports models. They're disguised, too, with dusts over their uniforms. Considering such tactics as an affront to Britain's sense of fair play, motorists are attaching signs on the back of their cars reading, "This is not a police car."

Canada Will Be Represented

No organization of a similar nature brings together more countries than the World's Poultry Science Association does at the World Poultry Congresses which are the triennial meetings of the association. Canada takes an important part in the spreading of scientific and practical poultry knowledge and will be represented at the next congress which will be held in Berlin, Germany, in 1935.

Free Thinking

Dr. Inge, late Dean of St. Paul's, did well to remind his hearers in his university sermon at St. Mary's Oxford, that originality means thinking for oneself and not merely thinking differently from other people. Free thinking is fine so long as there is sufficient emphasis on the latter word and not too much on the former.

Compilation of a city directory for New York is expected to give about 100,000 working days to the unemployed.

TWO-PIECE DRESS FOR TOWN OR MAKE IT FOR COUNTRY WITH SHORT SLEEVES

By Ellen Worth

Here's a stunning little two-piece dress of black chiffon, the smartest idea for town wear. The collar and bow, finished with picket edge, are of white chiffon.

It is especially nice choice for the business woman who hasn't always time to dress to keep dinner engagements.

It is a splendid choice for those week-end parties. Shantung-linen, tub pastel silks, dotted batiste, etc., are other nice mediums for this model.

Style No. 332 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Size 16 requires 3½ yards of 39-inch material with ¾ yard of 39-inch contrasting and 7¼ yards of brain trimming.

Patterns 15 each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day, the price is 15 cents.

Dairy Industry In U.S.

The dairy industry has become the most important branch of agriculture in the United States, notwithstanding the fact that production is almost entirely for domestic consumption, the exports of dairy products being comparatively insignificant. Dairying was the last important branch of agriculture in the United States to suffer from the depression.

Boys are not as good sleepers as girls, according to tests made by an Atlanta physician. His conclusion comes after 150,000 hours of watching children sleep, by means of special electrical instruments.

Not Operating Railroad

No Train Running On Line Into Vatican City

Pope Pius now has a railroad, a station, a tunnel, a bridge, a siding, switches, signals and a dispatcher's room, but no train and no apparent prospect of operating the line for many a month or year.

Built at a total cost of \$2,385,000 and paid for by the Italian Government under the provisions of the Lateran treaty of 1929, the railroad was completed a year ago. Since then the 2,615-foot road has remained idle.

There is a gorgeous station that would do honor to a modern city of 50,000 souls, but it is empty. There are tracks that have not felt the touch of wheels since a locomotive made a trial trip into Vatican city last year. The tunnel, dug into Vatican hill and built to facilitate switching without taking up too much valuable space, has its gaping mouth wide open, but never swallows any thing.

The railroad, in proportion to its length, is the most costly in the world. Including the station, tunnel and bridge, the cost was \$913 a foot. A railroad linking New York to San Francisco at the same price would run to about \$16,000,000,000, not including the rolling stock.

Yet the Pope is not giving any indication of ever using it. He has not yet placed the order for the construction of the papal train. Many plans and designs for such a train, including a special chapel coach, have been drawn, but nothing has been done toward putting them into execution.

The Italian Government naturally would be glad to lend the Pope a train for special trips if he wished. The King undoubtedly would offer the royal train.

Has Unusual Powers

Doors Open For Girl Of Her Own Accord

"I'll open the door for you, Marie," said the mistress of a villa at Nusse, Prague, to her servant, who was carrying a heavily laden tray.

But just as the servant got to the door it opened of its own accord.

The girl's employer thought she must be dreaming. Other members of the family, however, noticed that doors always opened for Marie when she approached them.

The cook confessed that she always sent Marie into the cellar for potatoes, because they rolled toward her of their own accord.

The girl herself has no feeling of any unusual powers. A psychical research society is now investigating the phenomena.

STOP THAT ITCH In One Minute

D. D. O. Prescription Speeds Relief

It's really surprising to know how D. D. O. Denim Pure, cooling, liquid, antiseptic, D. D. O. Prescription quickly stops itching, burning, stinging, mosquito, or other insect bites, rashes and other skin afflictions. Forty years' world-wide success. Its gentle oils penetrate the skin, soothing and healing the inflamed tissues. No fast—no Mess Ours, grossness and stinkiness—dries up almost immediately. Try D. D. O. Prescription today. Stops the most intense itching instantly. A 5-cent bottle, at any drug store, is guaranteed to prove—or money back. D. D. O. is made by the owners of ITALIAN BALM.

Christine Whiting Farmer
Author of
"One Wide River to Cross"
"The Unknown Port," Etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market for her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. They are met at the railway station by Columbine Nelson, who in turn introduces Mark and Matthew Adams, two neighbors of Aunt Columbine, and the party set out for Pine Ridge, which village causes dismay to both Nancy and Jack because of its dilapidated appearance and general look of poverty. Nancy and Jack are shown to the rooms they are to occupy, and both the young people consider the furniture and decorations hateful and contrasting the present quarters with their luxurious home in Boston, wonder if they can endure the change for any length of time. Aunt Columbine tells why she wrote the letter to them, and relates some of her early experiences at Pine Ridge, of hostile Indians and forest fires, of her father's hunt for gold, and of her mother's splendid spirit, but frail body, which could not endure the strain of pioneer life.

Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him which way to go. The truck accident, her fall, look around, and then go on to Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy is left all alone, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

New Go On With The Story

CHAPTER XIII.—Continued

The early winter darkness had fallen when they returned. Nancy had had "a wonderful day." She had lunched at a delightful little cafe, done her own Christmas errands, Aurora's, Cousin Columbine's, and even Matthew Adams'! For when she met her escort at the appointed time, the young man confessed that he had delayed his own holiday shopping in order to profit by her advice. "Wouldn't it be merciful, the cousin who was in college at Denver and was to spend her vacation at the ranch, approve of silk stockings as a gift? And what size must he get? What color? Darned if he knew! And would Nancy look at a luncheon set he wanted for his mother, and see if it were really any good?"

So Nancy stored her parcels in the old car, and fared forth again, this time with Matthew. But it was all fun, and after weeks of comparative solitude in Pine Ridge, the Christmas crowds seemed thrilling. Their

RELIEVE PERIODIC PAIN

If you suffer periodic pain, discomfort, try Lydia E. Pinkham's Tablets. In most cases they bring welcome relief. As Mrs. Caroline Newman says, "They ease the pain."

Mrs. Raymond Chapin, Route 4, Tibbitt, Ont., says, "I suffered some thing terrible. Had such backaches and headaches I was worn out. Your Tablets helped me. Let them help you, too. Ask your druggist."

Lydia E. Pinkham's TABLETS

errands accomplished, Matt took her to a place where they had hot chocolate and delicious sandwiches; and on the way home he drove with exceeding slowness, even after the dangerous pass was left behind.

The stars were out when they bumped the railroad track and started up the straggling familiar street. Dusk hid its shabbiness, and Nancy turned as she always did, for that matchless view of the white-crested Peak.

"Well, we're home," she said, and added, laughing: "That sounds exactly like Aurora, doesn't it? I've had a great time, Matt, and I do appreciate your letting me tag along. If your cousin's stockings don't turn out the right size, the saleswoman said they could be changed. I know your mother will love the linen—one one would; and—Will you look at that!" They were approaching the Nelson "mansion" now. "There's a light in the parlor! Is the president, or governor or some one calling on Cousin Columbine? Why? (as they turned in the gate), 'there are lights everywhere! What can be happening!'"

She looked up, at Matthew this time. There was, Nancy saw, an inscrutable smile curving his nice mouth, but all he said was: "Let's go in and see."

CHAPTER XIV.

Nancy was never to forget the moments that followed. As Matthew drove up before the house he blew three sharp blasts on the automobile horn, and said: "Don't bother with all those bundles, Nancy. I'll lug 'em in just a minute." Indeed, Nancy was so puzzled by the amazing illumination that she failed to see that they were stopping at the seldom-used front door; and, still dazed, with Matt's hand on her elbow, she was firmly propelled into what Jack called "the sacred parlor."

For a moment she just stood still, thinking the room was full of people until she realized that it wasn't a crowd at all, only the parlor, beautifully garlanded with Christmas greens, looked different. A second glance disclosed the company: Cousin Columbine in her scarlet middy and laced boots; a little woman with soft brown hair, and eyes shining with merriment, who must be "Aunt Aurora." By her side stood the tall, lean sunburned man who was her husband, looking, it seemed to Nancy, very little older than his mother. Then came Juanita Tubbs—Juanita in a sleeveless gown of such dazzling, variegated colors that

Nancy almost blinked when she looked straight at it and was thankful that Mary Taylor was wearing white Mark ("all dressed up in his Sunday best," thought Nancy) towered between Mary and a slender girl in blue ("The cousin from Denver"), while Jack, spick and span in his blue serge suit, and another boy ("The last of the Apostles, of course!") stood just behind them; and as a climax came Aurora attired in a gown of emerald taffeta with six flounces on the skirt and the inevitable apron tied snugly around her ample waistline.

No wonder Nancy stared! She stared so long that everybody shouted with laughter; and it was Cousin Columbine who explained: "It's only your debut, child. Don't look so dazed!"

"Your debut, staged in a different setting," smiled Eve Adams, and coming forward kissed Nancy on the cheek. "Welcome to Pine Ridge society, my dear! I really think we gave you a surprise."

"And if she don't rest straight upstairs and put on that party dress I took out of her closet," spoke up Aurora, "my company dinner'll be in ruins. Matthew Adams, you'll find your good clothes in Miss Columbine's bedroom, and don't be slow as cold molasses, either."

"Did—I do you know this all the time?" cried Nancy, wheeling on Matthew.

"I-I sort of suspected it," he confessed. "I mean—"

"Oh, come on, Matt," broke in his brother Mark impatiently. "Time flies and you've got to beautify yourself in honor of our debutante!"

"... And will you believe it," Nancy wrote home next day, "when I came down, there stood Matthew Adams looking absolutely stunning in a well-cut Tux! I almost passed out at sight of him."

Probably Matthew felt somewhat the same at the same moment, for Nancy herself, in that shift, and silver-shod, was (according to Mark Adams) "too easy to look at for any feller's peace of mind."

"You'll have to seat her next to Matthew, Miss Columbine," he said ruefully. "She makes the rest of us look like hick cowboys. I'd have swiped that Tux myself, Matt, if it had been two sizes bigger. It's the

NATURE'S MINERAL SALTS

only Tuxedo in Pine Ridge, Nancy—a relic of campus days which transforms my coward brother into a 'glorious Apollo,' as you can see for yourself. And—"

"Shut up!" commanded Matthew, blushing, while his mother slipped a protecting arm through his, and Aurora announced shrilly: "Come on! Get seated while I dish up the potato. Sakes alive, Nancy, you look like those pictures in the love magazines. And you too, Matthew Adams. That white shirt's awful becoming. Everything's ready and all those pesky candles lighted. Come on in!"

"I never saw a prettier table," wrote Nancy to her mother. "Eve that awful green-bronze china was inconspicuous, because it blended with the green-bronze leaves of the kinkinnick with which Mrs. Adams had decorated everything. It's the most graceful vine, with red berries like the partridge berries we have at home. There was a big brass bowl in the center of the table, and long sprays laid at intervals on the white cloth—a cloth bought in Denver in 1901, please understand, and used only on state occasions!"

"The terrible lamp was banished, and four tall brass candelsticks held red candles with a big red candle stood at every place. Even Cousin Columbine's scarlet middy seemed made for the occasion. She looked very distinguished at the head of the table; and they put me at the foot with 'Father Adam' on one side, and Mark (despite protests regarding his apparel) on the other.

"And did we eat? As Jack remarked, Aurora had done her darndest, and the old-fashioned Christmas dinner was superb. Once it struck me as funny that Juanita was among the guests, but my mother waited in us; but Cousin Columbine says that Aurora would never have recovered if her daughter had been left out. Mark Adams made place cards; and the minute I saw his beautiful lettering I knew who was going to paint the sign for my Aladdin Library! But to get back to my debut—"

The account of this party grew in to the longest letter that Nancy Nelson had ever written, which ended with a request to forward it to Aunt Judy. "I... for I can never write this again. I wonder what those wild Spear girls will think of my debut, Mother! Not much like what we planned, was it? But believe me, it was a grand party just the same!"

It is probable that all those present agreed with the girl. When at last they arose from the table and sought the gaily-festooned parlor, each one added his bit to the entertainment. There were charades; old-time songs with maledon accompaniment (a maledon brought from Chicago in 1881, Miss Columbine assured them proudly); as well as strictly modern "croonings" rendered by Mark; while Matthew left Nancy breathless for the second time that evening when, with the simple aid of Juanita's tam o' shanter and a plaid scarf, he was transformed into a very creditable Harry Lauder, and forgetting his shyness, sang "I Love a Lassie" in a delightful baritone.

Not until then did Aurora remove her apron.

"I'm going to recite 'Curfew Shall Not Ring To-night,'" she told the company. "I said that piece at a church soiree when Tubbs was courting me, and there wasn't a dry eye in the place when I got through."

This number brought such a deafening round of applause that the good women beamed with pleasure.

"It's your turn now, Miss Columbine," she said. "You tell us a story about old times to calm us down."

Cousin Columbine smiled as Matt drew her chair in the centre of the group.

"I'm going to tell you about my first Christmas tree," she began. "I couldn't have been more than three or four years old, and Mother and I were alone as we so often were in those days when Father was off adventuring. We were expecting him home, of course; but on Christmas Eve when he did not come, Mother went out and cut a tiny Christmas tree herself, and set it up in the corner of our room."

"I realize now that for months, possibly longer, she had been saving every bright scrap of ribbon, or calico, or paper that came her way—saving them to make a merry Christmas for her baby; and after I was sound asleep she must have spent those lonely hours trying to make

the little fir tree gay and pretty, while she listened tensely for Father's returning step and the longed-for whistle (it was, she told me, like the song of the hermit thrushes in New Hampshire), with which he always heralded his arrival.

"Well, no whistle came that night, and at last, bitterly disappointed, fearful for his safety as she always was, at any untoward delay, my mother crept into the big bed and dropped asleep. No doubt her pillow was wet with tears; but things looked brighter in the morning. It was a beautiful day. A flurry of snow had fallen in the night. Every bush and tree was white and frosted, which made her think of Christmases in old New England; and I, of course, was twittering with excitement. She could scarcely persuade me to eat breakfast I was so eager to examine every ornament and open the two parcels tied to the topmost branch of my small tree.

"At last she pushed aside our cold dishes. This morning they could wait, for after all, Christmas comes but once a year. She drew a chair close to the little tree; took me on her lap and put into my hands one of the gifts she had prepared so lovingly. You see, she had contrived twin dolls out of homemade clothes—plus—painted their faces very cleverly, and dressed them in scarlet flannel, for use as the other package; and as I sat there on my mother's knee, caressing this new baby, something, possibly the sense of being watched, drew her eyes away from me for a moment, and at that she saw her poor heart almost stopped beating. For there was a face at the window, peering in at us—the face of an Indian!"

"My soul!" breathed Aurora in an awed whisper; and as if not hearing her, Miss Columbine continued: "Perhaps you young folks can't realize what that meant to a pioneer woman alone in her cabin save for a little child. Instinctively her glance rose to the side lying ready for use on a shelf behind the stove, then to the fir tree; that emblem of 'Peace on earth, goodwill to men'; and just as the door latch rattled ominously, she cast a decision."

Altar Brought From France

Hidden In Woods When English Captured French Fort

In the Church of the Sacred Heart at Red Island, a few miles from Sydney, Nova Scotia, is a storied altar that was brought from France in 1691. It was placed in the French fort at St. Peters, or Port Toulouse as it was then called. When the English captured the fort the altar was carried off by the French to the woods, where it was hidden. Later it was found by the Indians, who jealously guarded it until a priest stationed at Red Island finally persuaded them to allow him to remove it to the Roman Catholic church.

The Explanation

Mayor: "I never saw the park littered so with paper as it is this morning. How do you account for it?"

Superintendent: "The park commissioner had leaflets distributed yesterday asking people not to throw paper about."

Bell Still Cracked

When Big Ben was installed in London 75 years ago, the huge bell cracked. Another bell was cast, but this also cracked on installation. It has remained cracked ever since.

Quality In Binder Twine

Inspection In Recent Years Has Shown Steady Improvement

The binder twine being used to harvest Canada's grain crop comes from a number of sources. Canadian made twine supplies a large part of the domestic demand and considerable quantities made in the Dominion are exported to other countries, but, binder twine from several other countries has come to share the Canadian market. The greater part of the importations into Canada are from Great Britain, Ireland and Holland and in recent years small quantities have also been received from Belgium and Germany.

The law requires that each ball of binder twine sold in Canada shall bear a label stating the number of feet of twine per pound in the ball, whether 500, 550, 600 or 650 feet. This is a case where quantity is the estimate of quality. Inspectors of the Dominion Department of Agriculture Seed Branch inspect Canadian made twine at the places of manufacture and imported twine at storage warehouses, and by a system of measurement and calculation determine the actual number of feet per pound as compared with the length guaranteed.

Results of binder twine inspection in recent years have shown a steady improvement in both Canadian and imported twine used in Canada. More than three hundred samples were taken of the twine distributed in Canada in 1934, the tests of which showed that 47 per cent. had actually more twine to the pound than was guaranteed and 14 per cent. had exactly the length guaranteed. The remainder of the samples had some shortage which was considerable in most cases and only 25 per cent. had a shortage of over 5 per cent., which is the limit of shortage allowed by law.

Tensile strength in binder twine is not subject to legal control. Inspectors, however, give some attention to this factor but it is now seldom that a sample is found in which the tensile strength is too weak for ordinary grain binding.

Find Ancient Fossil

May Have Remained Sees Thirty Million Years Ago

A large fossil found in lower cretaceous formations on the west coast of Vancouver Island may be part of an Ichthyosaurus that roamed the seas some 30,000,000 years ago, in the opinion of Professor M. P. Bancroft, head of the geological survey party which salvaged the fossil.

The fossil was found encased in rocks in front of the home of G. F. Smith, who said the waves had laid it bare some time within the last two years. Rev. Anthony Terhaar of Friendly Cove, B.C., assisted Professor Bancroft in recovering the fossil.

Another Modern Step

Tahiti Is Waiting For Opening Of Beauty Parlor

Natives of Papeete, Tahiti, are awaiting civilization's final conquest. In a steady procession have come automobiles, electric lights, filling stations, radios, electric refrigerators, telephones and movies. But it was only recently that ground was broken for a beauty parlor. Already a few girls have crimson finger and toe nails, plucked eyebrows, mascaraed eyelashes and permanent waves, much to the consternation of the native fathers.

Science has been able to create an electric spark that, during its brief life of one one-hundredth-of-a-second, is brighter than the sun.

"We never hear our own voices exactly as other people hear them," states a scientist. Probably that explains why so many of us sing.

Firestone

Little Helps For This Week

"Therefore to him that knoweth to do good and doeth it not, to him it is sin." James 4:17.

Day by day,
Dear Lord of Thee three things I pray:
To see Thee more clearly,
To love Thee more deeply,
To follow Thee more nearly,
Day by day.

Hurt not thy conscience with any known sin.

Deep-rooted customs, though wrong, are not easily altered, but it is the duty of all to be firm in that which they certainly know is right for them.

He often acts unjustly who does not do a certain thing, not only he who does a certain thing.

Every duty we omit obscures some truth we should have known.

Missionaries Use 'Plane

Only Way To Reach Tribes In New Guinea

The first air-missionaries of the Church of England are starting work in New Guinea.

They are going to tackle one of the most difficult and dangerous jobs imaginable, that of taking the Gospel to 40,000 tribesmen living in virgin and mountainous country to which the air affords the only access and where the natives are very wild.

Six white men, with a staff of native teachers, will undertake the work, which, it is estimated, will cost \$25,000 to establish and \$10,000 a year to maintain. Their base will be at the Wan Goldfields, now rapidly developing, and all supplies will come up by air from the coast.

Pilot Has Lucky Landing

A monoplane made a forced landing at Coney Island, New York, recently, in so small a space it had to be dismantled for removal. The ship, experiencing motor trouble, circled Manhattan Beach before it slid safely to earth, fitting snugly in a chink in a block of 2,000 parked automobiles.

Local News

Miss Stewart, of Naco, spent the week end with her grandmother, Mrs. Stewart, and aunt, Mrs. McKenzie.

Mr. Ed. Stewart, of Naco, was a Chinook visitor on Monday.

Jas. Aitken is a Calgary visitor this week.

Mr and Mrs. C. W. Rideout and family who were visiting at Comrey and Medicine Hat returned Thursday night.

Mrs. Kerby and daughter of Hanna who have been visiting for two weeks with her parents Mr. and Mrs. Jas Young returned Tuesday.

The Friendly Circle will hold its next meeting at the home of Mrs. Jas. Young on Thursday Aug. 29, instead of in September.

We are glad to hear that the case of chicken pox reported here has turned out to be just a bad rash.

Chas' Bennett, of Delia was here over the week end.

Heavy Frost Damage In Peace River

OTTAWA, Aug. 20, — The Dominion bureau of statistics today reported "spotty but heavy frost damage" in the grain areas of the "Peace River district of Alberta and over a 250-mile stretch of country running east from Edmonton to Scott, Sask."

It said, "Heavy showers caused lodging of crops in the Peace River country."

The report said information from Manitoba and Southeastern Saskatchewan where the previously reported rust attack was most severe were "extremely pessimistic" and that very little bread wheat will be worth threshing in Manitoba since the yields are low and the grade poor." It added Durum wheat also was seriously affected.

The heavy straw is lodged and tangled so that harvest is a laborious and expensive operation. Similar reports come from Southeastern Sask. and rust is now causing damage to late crops northwest of Moose Jaw.

Promising in Central Sask. The central area of Saskatchewan, containing about half the wheat acreage, continues promising, while coarse grains are generally good and feed supplies ample. The wet cold weather in Alberta during the past week was very unfavorable. Harvest was hindered in the south, and ripening in the north.

Saskatchewan: "Heavy rains over the week-end seriously interfered with the harvest, while in Northwestern Saskatchewan, freezing temperatures were recorded. The superintendent of the Dominion experimental station at Scott describes this as the most serious summer frost ever experienced while grain was standing.

"Little cutting was done before the frost and most standing grain has been affected."

The sixth of a series of studies dealing with weed research and control has been issued by the Northwest Grain Dealers' Association. This pamphlet deals with chemical weed killers, and is the result of research conducted by Dr. G. P. McKostle, Professor of Agronomy, University of Manitoba, and Mr. W. Tildesley, M. Sc., Assistant on Weed Research and financed by line elevator companies.

The pamphlet with proper chemicals to use in weed destruction. It outlines methods of mixing to avoid burning body and clothing. Manner of spraying, when to apply, and effect on grain yields are set forth.

Summarizing the results of the survey, the pamphlet states:

1. The use of chemical weed killers is only justified where cultivation cannot be properly done, or where it has proven ineffective.
2. Some annual weeds can be successfully and profitably controlled in growing crops.
3. The profitable use of chemical for the control of perennial weeds is confined almost entirely to the treatment of rather small patches.
4. Fertilizers, properly applied are a material aid in lessening the menace in the common cereal crops.

Copies of this booklet can be obtained, free of charge from any line elevator agent or by writing to the Northwest Grain Dealers' Association Winnipeg.

CONSERVATIVES PICK COUGHLIN AT CORONATION

Local Barrister to Contest
Acadia Federal Seat—
Here Since 1916

C. A. Coughlin, barrister of Hanna for almost twenty years, won the Conservative nomination for Acadia Federal Constituency at the convention held at Coronation on Monday afternoon. Mr. Coughlin defeated three other suggested candidates in the persons of Dr. J. J. MacPherson, of Cassiar; Dr. Meneely, of Coronation and A. O. Thomas of Coronation.

THE CHINOOK ADVANCE

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter. The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per count line. Legal advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

Advertisements under this heading are charged at the rate of 50c for 25 words or less per week, with 10c for each additional 5 words. Three weeks for the price of two. All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

Wm. Milligan left Thursday for Lethbridge where he will be employed for a few weeks.

Mrs. Loader who has been visiting with friends at Vancouver for the past month returned last week.

The harvest is in full swing this week in the Chinook district. The harvest will be short here.

Imperial Oil Stock Distributed To Employees

Distribution of 208,528 shares of Imperial Oil Ltd. with a market value exceeding \$4,000,000 has been made within the past few days to 3,557 of the company's employee's in Canada. Some of these shares went into practically every community in the country and a list of the occupations of the employees who received them would be almost endless.

In Manitoba 3,458 shares were distributed, in Saskatchewan 13,170, and in Alberta 21,849.

The employees acquired this stock over a period of three years through the company's Fourth Co-Operative Investment Trust. Due to the company's contribution and appreciation in the value of the stock the employees actually paid only about \$1,000,000. G. Harrison Smith, President of Imperial Oil, commenting on this distribution said that years ago the share holders had speculated on Canada's future by investing millions of dollars in equipment to serve consumers everywhere in Canada. As business developed the importance of maintaining a personal touch with the consumer and of promoting industry and enterprise became increasingly evident and so the plan of making employees part owners of the business was devised. "It is part of a general plan relating to proper and just treatment of labour", Mr. Smith said, "and is based not only on the belief that labour is entitled to good treatment but on the knowledge that efficient and economical operation of an industry depends upon a loyal and enthusiastic personnel. In most cases" he said, "when you deal with an employee of Imperial Oil you are dealing with a part owner of the company. Of 55,000 Canadian shareholders in the company, more than 5,000 are employees."
